WORK.**

DOORS. DOCKS. DONE.

CENTRAL STATE
DOOR SERVICE

READY FOR DEPLOYMENT. WE'VE GOT THIS.

RAPID DEPLOYMENT

Using the most innovative technology and having the luxury of a large service & installation team, we are ready to respond swiftly when you need us the most. Showing up is one thing, showing up fully equipped and ready to rock is how we do things. **We've Got You Covered!**

TOP NOTCH TECHS

It starts with a careful selection of good, honest and hard-working people. Then we get right to training at **Central State University** which ensures our technicians deliver exceptional services for you. Each technician attends in-house training and up to 6 months of field training prior to flying solo.

FULLY LOADED PARTS

With almost **80-Years of Expertise**, we've learned a thing or two about stocking the right parts. Our service rigs are fully stocked and re-supplied daily from our massive in-house inventory which is a critical element for completing the majority of your services on the very first visit.

EXCEEDING EXPECTATIONS

As we strive to “Exceed Expectations”, we look for ways to resolve our customers’ service issues immediately, because in most cases an equipment failure creates an operational crisis and safety concern within your workplace. Having generations of experience since 1941, we have identified some of the critical service issues that can interrupt your business and create significant safety concerns. We’re prepared to resolve those issues faster than ever. Having the unmatched capability to perform Same Day Service or within 24-hours, getting your business back to running safely and at full speed.

HELICALLY WOUND TORSION SPRING FABRICATION:

The most critical component, the heart of the dock door is the helically wound torsion spring system. When the spring fails, you have a major safety issue and you need that opening to be back in action. That’s why our service rigs are set up to fabricate your new spring to the exact specifications. Our customers rely on this capability to complete more than 95% of broken spring replacements on the very first visit.

No waiting. No excuses. No unsafe temporary repairs.

SECTIONAL DOOR FABRICATION:

Dock doors are no match against a forklift. When damage occurs, you need a source to get you back on track ASAP! We understand how damaged doors can impact your operations. Our commitment to improved uptime means we are ready to fabricate new replacement sections of the most popular door brands the SAME DAY as your call.

Imagine a service provider that understands immediacy.

SEE US IN ACTION.

YOU NEED SUPERIOR SERVICE & RELIABILITY A PARTNER YOU CAN TRUST.

ROLLING STEEL CURTAIN FABRICATION:

When the inevitable happens, we are ready with SAME DAY curtain slats & bottom bar fabrication for the most popular brands of rolling steel doors. We stock Flat Slat, Curved Slats and Insulated Flat Slats and structural steel angle for double-angle bottom bar replacements.

Why wait 4-weeks when you can get fixed up today?

ROLLING STEEL BARREL REFURBISHING:

Unfortunately, you cannot see a broken spring on a rolling steel door as it is hidden within the barrel. Operating your industrial rolling steel door with broken springs is not only unsafe, but is sure to damage your industrial operator. With routine PM inspections, we can catch it before any further damage or injury to personnel occurs. Instead of waiting a month or more, we will remove the barrel, fabricate a new spring system and re-install it within 24-Hours of your call.

That's some serious service!

SEE US IN ACTION.
